Hi Wendy,

I wanted to share with you some of the feedback your team provided on you. I think it will be useful for interviews, applications, etc. And hopefully it will also just make you feel good at the end of a very long semester and year!!

How they described you:

- Wendy is quiet, so some may miss this about her, but she is one of the best writers I have ever seen. She is also kind and has great ideas, she makes the team better.
- Wendy did a lot of the graphs and did an incredible job of putting those together in an easily digestible way
- Wendy was so great with the data and her experience with engineering really made her stellar at compiling and analyzing all of it in a really concise and effective way
- she was kind of like the quiet underrated team member that ended up being one of the hardest workers. she's very smart and awesome. worked really hard on our project
- Wendy is amazing, she comes up with great ideas and is always willing to jump in and do extra work.
- Wendy always made sure to add more data to our report. She made sure that every recommendation had data to back up our claims.
- Last minute, Wendy added 5 charts to our slides that made a huge impact to our final presentation. She really made our team proud by speaking up to John and showing him ways to improve their company.
- Our final document was very clean due to Wendy's data and charts that she found on her own to help our team. She made our team stand out and a lot more credible.
- I loved how Wendy was able to bring out team together during our final presentation. She was a huge help to our team.

Self reflection: I did a lot of the data analysis for our team. I was always at team meetings, I made several plots to help us present this information in our recommendation report and final presentation, I made my recommendation data driven, and I started on the appendix with Madi.

It was wonderful working with you this semester! I feel like I saw so much growth in you over the last year!!!

Best of luck, and congratulations!! I'm so excited to see what you do next!

Best,
Dr. Wright
